.....

Feature: Login to Internet Banking

Scenario Outline: Successful login with valid credentials

Given I open the login page

When I type "<username>" into the Username field

And I type "<password>" into the Password field

And I type "<captcha>" into the Captcha field

And I click the Login button

Then I should be logged in successfully

Examples:

username	password	captcha
"rajesh123"	"password1"	"abc12"
"sita456"	"password2"	"def34"
"karthik789"	"password3"	"ghi56"
"anitha321"	"password4"	"jkl78"

Scenario Outline: Unsuccessful login with invalid credentials

Given I open the login page

When I type "<username>" into the Username field

And I type "<password>" into the Password field

And I type "<captcha>" into the Captcha field

And I click the Login button

Then I should see an error message

Examples:

username	password	captcha
"invaliduser"	"wrongpass"	"xyz99"
"rajesh123"	"wrongpass"	"abc12"
"sita456"	"wrongpass"	"def34"
"karthik789"	"wrongpass"	"ghi56"
