Senior Test Automation Engineer

Chennai, Tamil Nadu | [Phone Number] | [Email Address] | [LinkedIn Profile URL]

Professional Summary

Test Automation Architect with over **8+ years of experience** specializing in the **BFSI domain** and enterprise software testing. Proven track record of designing high-scalability automation frameworks that reduce regression cycles by up to **70%**. Expertise in delivering robust, ATS-optimized Selenium Java solutions for complex financial modules, including UPI and IMPS payment gateways. Committed to engineering quality at the speed of development to meet the rigorous standards of Tier-1 tech organizations like **Amazon**.

Core Competencies

- **Automation Frameworks:** Selenium WebDriver, TestNG, Cucumber (BDD), Page Object Model (POM), Data-Driven & Hybrid Frameworks.
- **Languages & Tools:** Java, Python, Maven, Jenkins (CI/CD), Git/GitHub.
- **API & Backend Testing:** REST Assured, Postman, SQL (Complex Joins & Data Validation).
- **Domain Expertise:** BFSI (Banking, Financial Services, and Insurance), Payment Gateways, UPI/IMPS Protocol Testing.
- **Advanced Methodologies:** Agile/Scrum, Shift-Left Testing, Automation Effort Estimation, Performance Testing.

Technical Experience

Senior Test Automation Engineer | [Current Company]

Chennai, India | [Date] – Present

- **Architected a Hybrid Automation Framework** using Selenium Java and TestNG, resulting in a **40% increase in test coverage** across the core Banking module.
- **Engineered end-to-end (E2E) automation suites** for UPI and IMPS payment flows, ensuring 99.9% accuracy in financial transaction validation.
- **Integrated Selenium scripts into Jenkins CI/CD pipelines**, enabling automated smoke tests that reduced feedback loops for developers from hours to **15 minutes**.
- **Optimized execution time by 50%** through the implementation of parallel test execution and headless browser testing.
- **Led a team of 5 testers** in functional test management, identifying over **200+ critical bugs** before production release in the BFSI sector.

Automation Test Engineer | [Previous Company]

[Date] – [Date]

- **Developed and maintained 500+ automated test cases** for retail banking applications using Selenium and Cucumber.
- **Implemented Data-Driven testing** to validate complex financial calculations and multi-currency support, decreasing manual effort by **120+ man-hours per month**.
- **Collaborated with DevOps** to maintain local and remote Selenium Grids for cross-browser and cross-platform compatibility testing.
- **Created reusable utility libraries** in Java for common UI interactions, reducing script maintenance effort by **25%**.

Key Projects & Achievements

- **Payment Module Digital Transformation:** Successfully migrated a legacy manual testing process for UPI/IMPS fund transfers to a 100% automated workflow, ensuring zero critical defects in production for **4 consecutive quarters**.
- **Automation Estimation Model:** Developed a proprietary "Automation Effort Estimation" template used by department heads to accurately predict project timelines and resource allocation.
- **Performance Benchmarking:** Utilized JMeter alongside Selenium to identify memory leaks in payment processing forms, improving page load speed by **2 seconds**.

Education & Certifications

- **Bachelor of Engineering (B.E.) in Computer Science** | [University Name]
- **ISTQB Certified Tester** (Advanced Level - Test Analyst)
- **Oracle Certified Associate, Java SE Programmer**

Technical Toolkit

Category	**Tools/Technologies**
Web Automation	Selenium WebDriver, Grid, Playwright
Testing Frameworks	TestNG, JUnit, Cucumber
Build/CI-CD	Maven, Jenkins, Bamboo, Docker
Version Control	Git, Bitbucket, SVN
Defect Tracking	Jira, HP ALM, Azure DevOps
Database	Oracle, MySQL, PostgreSQL
